Ways to Use Journal Articles Published by Elsevier: A Practical Guide

CONTENTS

How authors can reuse their own articles published by Elsevier

- General use of articles
- Commercial purposes
- Offprints of articles
- Web posting of articles
- Depositing of articles to PubMed Central
- Other mandatory depositing of articles
- Citations of articles

How persons affiliated with institutes with SciVerse ScienceDirect subscriptions can use articles from subscribed content

- Professional use of articles
- Scholarly sharing of articles
- Coursepacks and eReserves
- Links to articles
- Interlibrary loan
- Live reference
- Use by library guests

How anyone can use articles published by Elsevier

- Bibliographic references
- Short quotes and reproduction of material from articles
- Photocopies of articles
- Purchase of individual articles
- Reprints of articles

International Association of Scientific, Technical & Medical Publishers' STM Permissions Guidelines

Elsevier is a signatory to the International Association of Scientific, Technical & Medical Publishers' STM Permissions Guidelines. These are designed to establish a standard and reasonable approach to permission granting for republication purposes across all signatory publishers.

www.stm-assoc.org

stm

General use of articles

Authors publishing in Elsevier journals retain wide rights to continue to use their works to support scientific advancement, teaching and scholarly communication.

An author can, without asking permission, do the following after publication of the author's article in an Elsevier-published journal:

- Make copies (print or electronic) of the article for personal use or the author's own classroom teaching
- Make copies of the article and distribute them (including via e-mail) to known research colleagues for their personal use but not for commercial purposes or systematic distribution as defined on page 3 of this pamphlet
- Present the article at a meeting or conference and distribute copies of the article to attendees
- Allow the author's employer to use the article in full or in part for other intracompany use (e.g., training)
- Retain patent and trademark rights and rights to any process or procedure described in the article
- Include the article in full or in part in a thesis or dissertation
- Use the article in full or in part in a printed compilation of the author's works, such as collected writings and lecture notes
- Use the article in full or in part to prepare other derivative works, including expanding the article to book-length form, with each such work to include full acknowledgment of the article's original publication in the Elsevier journal
- Post, as described on page 3, the article to certain websites or servers

Commercial purposes

Authors of Elsevier-published articles may not make copies of them or distribute them for commercial purposes. Such purposes include:

- The use or posting of Elsevier-published articles for commercial gain, including companies posting for use by their customers Elsevier-published articles written by the companies' employees. (Examples of such companies include pharmaceutical companies and physician-prescribers.)
- Commercial exploitation such as directly associating advertising with online postings of Elsevier-published articles
- Charging fees for document delivery or access to Elsevier-published articles
- Systematic distribution of Elsevier-published articles to parties other than known research colleagues via e-mail lists or listservers, whether for a fee or for free

Offprints of articles

For most Elsevier journals, the corresponding author (the person designated to receive all correspondence concerning an article) receives either free paper offprints or a free electronic offprint of the published article. The e-offprint is a watermarked PDF of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use. Please note that these PDFs may not be posted to public websites.

More information about offprints appears in the Journal Authors' section of the Elsevier website at www.elsevier.com/authors/offprints.

Any author with a specific question about offprints can e-mail authorsupport@elsevier.com.

The screenshot shows the Elsevier website interface. At the top, there is a search bar with the text 'Type here to search on Elsevier.com' and a magnifying glass icon. Below the search bar are navigation tabs: 'Books & journals', 'Online tools', 'Authors, editors & reviewers', 'About Elsevier', and 'Help'. The 'Authors, editors & reviewers' tab is selected. On the left side, there is a sidebar menu with the following items: 'For Authors', 'Journal Authors' Home', 'Rights & Responsibilities', 'Funding Body Agreements', 'Access', 'Author Services', 'Journal Performance', 'Book Authors' Home', 'Products', 'Support & contact', 'About Elsevier', and 'User Resources'. The main content area is titled 'OFFPRINTS' and contains the following text: 'What are offprints? An offprint is available immediately upon publication and is an exact copy of your complete article. Offprints are provided freely to authors in either paper or digital (PDF) form. As standard we provide e-offprints (PDFs). However, some journals offer paper offprints instead or in addition (and this is clearly indicated in the Guide for Authors which you will find on the journal's homepage). An e-offprint is a watermarked PDF version of your published article. The e-offprint is delivered by e-mail, so it is a fast and convenient way for you to receive and disseminate your published article as soon as it is available. For details about permitted use of your offprints please refer to Authors' Rights. How do I request additional offprints? You will automatically receive an Offprint Order Form when your paper is published. If several authors are listed, the named corresponding author is the corresponding author's duty to compile requests from all co-authors and return the order form to the publisher.

Find offprints information in the Journal Authors' section of the Elsevier website at www.elsevier.com/authors/offprints.

Web posting of articles

Elsevier routinely analyzes and modifies our policies to ensure we are responding to authors' needs and concerns, and the concerns of the research and scholarly communities. Definitions and policies pertaining to preprints, accepted author manuscripts and published journal articles are described below.

PREPRINTS

Definition: A preprint is an author's own write-up of research results and analysis that has not been peer reviewed, nor had any other value added to it by a publisher (such as formatting, copy editing, technical enhancement and the like).

Policy: An author may, without requesting permission, use the preprint for personal use, internal institutional use, and permitted scholarly posting.

Personal Use: Use by an author in the author's classroom teaching (including distribution of copies, paper or electronic), distribution of copies to research colleagues for their personal use, use in a subsequent compilation of the author's works, inclusion in a thesis or dissertation, preparation of other derivative works such as extending the article to book-length form, or otherwise using or reusing portions or excerpts in other works (with full acknowledgment of the original publication of the article).

Internal Institutional Use: Use by the author's institution for classroom teaching at the institution (including distribution of copies, paper or electronic, and use in coursepacks and courseware programs). For employed authors, the use by their employing company for internal training purposes.

Permitted Scholarly Posting: Posting by an author on open websites operated by the author or the author's institution for scholarly purposes, as determined by the author, or (in connection with preprints) on preprint servers.

If an electronic preprint of an article is placed on a public server prior to its submission to an Elsevier journal, this is not generally viewed by Elsevier as prior publication; therefore, Elsevier will not require authors to remove electronic preprints of an article from public servers should the article be accepted for publication in an Elsevier journal.

However, please note that Cell Press and *The Lancet* have different preprint policies and will not consider for publication articles that have already been posted publicly.

Anyone with a question regarding preprint posting and subsequent submittal of a paper to an Elsevier journal should consult that journal's instructions to authors or contact its editor.

ACCEPTED AUTHOR MANUSCRIPTS

Definition: An accepted author manuscript (AAM) is the author's version of the manuscript of an article that has been accepted for publication. It may include any author-incorporated changes suggested through the processes of submission processing, peer review, and editor-author communications. AAMs do not include other publisher value-added contributions such as copy editing, formatting, technical enhancements and, if relevant, pagination.

Policy: Authors retain the right to use the AAM for personal use, internal institutional use and permitted scholarly posting (as previously defined) *provided* these are *not* for purposes of commercial use or systematic distribution.

Commercial Use of AAMs: Use or posting for commercial gain, whether for a fee or for free, or to substitute for the services provided directly by the journal including:

- The posting by companies of their employee-authored works for use by customers of such companies (e.g., pharmaceutical companies and physician-prescribers)
- Commercial exploitation, such as directly associating advertising with such posting or the charging of fees for document delivery or access

Systematic Distribution of AAMs: Policies or other mechanisms designed to aggregate and openly disseminate, or to substitute for journal-provided services, including:

- The systematic distribution to others via e-mail lists or listservers (to parties other than known colleagues), whether for a fee or for free
- The posting of links to articles by commercial third parties including pharmaceutical companies
- Institutional, funding body or government manuscript posting policies or mandates that aim to aggregate and openly distribute the work of its researchers or funded researchers
- Subject repositories that aim to aggregate and openly distribute AAMs authored by researchers in specific subject areas

Appropriate Bibliographic Citation: Authors posting an AAM online should later add a citation for the published journal article indicating that the article was subsequently published, and may mention the journal title provided they add the following text at the beginning of the document:

NOTICE: This is the author's version of a work that was accepted for publication in <Journal title>. Changes resulting from the publishing process, such as peer review, editing, corrections, structural formatting, and other quality control mechanisms, may not be reflected in this document. Changes may have been made to this work since it was submitted for publication. A definitive version was subsequently published in JOURNAL TITLE, VOLUME #, ISSUE #, DATE, DOI.

Elsevier believes that individual authors should be able to distribute their AAMs for their personal needs and interests, e.g., posting to their websites or their institution's repository, e-mailing to colleagues. However, our policies do not permit the systematic distribution of AAMs to ensure the sustainability of the journals to which AAMs are submitted. Therefore, deposit in, or posting to, subject-oriented or centralized repositories (such as PubMed Central), or institutional repositories with systematic posting mandates is permitted only under specific agreements between Elsevier and the repository, agency or institution, and only consistent with the publisher's policies concerning such repositories.

PUBLISHED JOURNAL ARTICLES

Definition: A published journal article (PJA) is the definitive final record of published research that appears or will appear in the journal and embodies all value-adding publisher activities including copy editing, formatting and, if relevant, pagination.

Policy: Elsevier guarantees each PJA's authenticity. We work with others (e.g., national libraries) to preserve them for posterity and in perpetuity, and we invest to drive their usage. We strictly apply an absolute guideline regarding their location: Every PJA will reside only on a completely controlled site because this is the only way that we as the publisher can guarantee that each PJA is permanent, authentic and unaltered.

An author may use the PJA for personal use and internal institutional use as defined above. In the interest of safeguarding the correct scientific record, Elsevier does not permit the posting of PJAs (Elsevier-provided PDF or HTML files) on any open websites. This is to ensure that the final published version of an article, which has been edited and peer reviewed according to the publishing standards of an Elsevier journal, is always recognized as such only via the journal itself, whether in print or electronic format. PJAs may not be used for commercial use or for systematic distribution as defined on page 3.

The posting of the PJA to websites to fulfill drug regulation authority approval of therapeutic agents is not permitted in accordance with the policy outlined above. Where applicable, Elsevier permits the inclusion of an article title and abstract to fulfill drug regulation authority requirements, provided this is accompanied by a link to the PJA on the publisher's website.

Depositing of articles to PubMed Central

Elsevier has established agreements with several funding bodies, including the US-based National Institutes of Health, to ensure that authors who publish in our titles comply with the requirements of their funding bodies. Authors whose research was funded in whole or part by these funding bodies are required to deposit their final accepted manuscripts with PubMed Central (PMC), which may be considered a special repository. As a service to our authors, Elsevier deposits on their behalf their final accepted manuscripts to PMC. Authors publishing with Elsevier should not directly deposit their manuscripts or their final articles to PMC.

At the moment, Elsevier has established agreements or policies to ensure authors whose articles appear in Elsevier journals can comply with manuscript archiving requirements of the following funding bodies:

- Arthritis Research UK
- Austrian Science Fund
- BBSRC
- British Heart Foundation
- Cancer Research UK
- Chief Scientist Office
- Department of Health UK
- ESRC
- Howard Hughes Medical Institute
- Medical Research Council UK
- National Institutes of Health
- Telethon
- Wellcome Trust

Note: The list of funding bodies with which Elsevier has agreements, such as the ones requiring deposit to PMC, may grow and the requirements of some funding bodies may differ.

For further details, please see www.elsevier.com/fundingbodies.

Other mandatory depositing of articles

If an institution requires that all papers published by its faculty, researchers or employees be deposited in its institutional repository, a special arrangement or agreement with Elsevier is required.

If you are an institution or funding body and would like to discuss putting in place an agreement with Elsevier, or an institution that requires all papers published by its faculty, researchers or employees be deposited in its institutional repository, please contact universalaccess@elsevier.com.

Citations of articles

Each copy, print or electronic, or other use of an Elsevier-published article must include an appropriate bibliographic citation detailing the article's publication in an Elsevier journal.

In the case of preprint posting of an article, the author may later add a citation, indicating the article was subsequently published by Elsevier and mentioning the journal title. Such a citation must include the following text and must appear at the beginning of the document:

NOTICE: This is the author's version of a work accepted for publication by Elsevier. Changes resulting from the publishing process, including peer review, editing, corrections, structural formatting and other quality control mechanisms, may not be reflected in this document. Changes may have been made to this work since it was submitted for publication. The definitive version has been published in JOURNAL TITLE, VOLUME #, ISSUE #, DATE, DOI.

doi:10.1016/j.elerap.2011.05.004
How to Cite or Link Using DOI

The screenshot shows the ScienceDirect interface for an article. A callout bubble points to the DOI 'doi:10.1016/j.elerap.2011.05.004' located in the top left area of the article content. Another callout bubble points to a text box that says 'Find the DOI in the top left area on each article on SciVerse ScienceDirect at www.sciencedirect.com.' The article title is 'Examining success factors in the adoption of digital object identifier systems' by Sungbum Park, Hangjung Zo, and Andrew P. Ciganek.

Understanding and Using Digital Object Identifiers

Digital Object Identifiers (DOIs) are links guaranteed to remain valid even if articles move between DOI-compliant platforms, such as SciVerse ScienceDirect.

Regardless of the publisher or author of an online publication, the structure of a DOI link is always the same, which makes DOIs easy to use.

DOI links have the following structure: <http://dx.doi.org/doi>. An example is <http://dx.doi.org/10.1016/j.elerap.2011.05.004>. A DOI entered in a Web browser must be preceded by <http://dx.doi.org/>.

On ScienceDirect, the DOI appears in the top left area on each article. When Elsevier-published articles are cited, Elsevier asks that their DOIs be included. Stating the DOIs may help current or future researchers find cited articles.

HOW PERSONS AFFILIATED WITH INSTITUTES WITH SCIVERSE SCIEDIRECT SUBSCRIPTIONS CAN USE ARTICLES FROM SUBSCRIBED CONTENT

Professional use of articles

Current SciVerse ScienceDirect subscription agreements allow authorized users to access, search, browse and view subscribed content, including articles from journals, and to print or download a limited number of articles, abstracts and records.

In general, Elsevier does not allow copying, printing or downloading entire issues of journals or otherwise substantially or systematically reproducing or retaining Elsevier-published articles.

Local database retention of Elsevier-published articles is only permitted if an institution or corporation has made an explicit agreement with Elsevier to acquire retention rights or if the institution or corporation has a digital rights license with a local reproduction rights organization (RRO), e.g, the Copyright Clearance Center in the US or the Copyright Licensing Agency in the UK. For more information on your local RRO and what it can offer, visit the International Federation of Reproduction Rights Organisations' website at www.ifrro.org.

Scholarly sharing of articles

Current ScienceDirect subscription agreements permit authorized users to transmit excerpts of subscribed content, such as an article, by e-mail or in print, to known research colleagues for the purpose of scholarly study or research. Recipients of such scholarly sharing do not themselves have to be affiliated with an institute with a ScienceDirect subscription agreement.

Coursepacks and eReserves

Any academic or government institute with a current ScienceDirect subscription can incorporate links to subscribed content, including full-text articles, into electronic coursepacks or eReserve lists for use in connection with courses offered for academic credit by the subscribing institute.

For any similar use for a noncredit course or one offered by a corporation, an institute or corporation must obtain prior written permission from Elsevier and a fee may be required. Anyone interested in such permission should contact the Elsevier Global Rights Department at permissions@elsevier.com.

Links to articles

Any institute with a current ScienceDirect subscription may provide links on the institute's home page, library website or online catalog to subscribed Elsevier journals or articles. The ScienceDirect Info site offers shortcut URLs to help information professionals put in place deep links to subscribed Elsevier journals or articles. For more information, see www.info.sciverse.com/sd/shortcutlinks.

Learn how to set up shortcut links to SciVerse ScienceDirect journals or articles by visiting www.info.sciverse.com/sd/shortcutlinks.

Interlibrary loan

The interlibrary loan (ILL) policy for electronic journals is included in each institution's agreement with Elsevier for ScienceDirect. In short, the provision allows and provides for the use of electronic journal articles as a source for fulfillment of ILL requests, with some restrictions. A summary of Elsevier's current ILL policy follows.

Elsevier grants subscribing institutes the right to use articles from subscribed ScienceDirect content as source material for ILLs subject to the following conditions:

- Each ILL request must come from an academic or other noncommercial, noncorporate research library located in the same country as the subscriber.
- Each requested article must be printed by the subscriber (not applicable to US customers) and mailed, faxed or transmitted by Ariel (or a similar ILL system) to the requesting library.

If a corporate or commercial entity is seeking a ScienceDirect article, instead of requesting ILL, that entity may use ScienceDirect's Pay per View service on a guest basis. For details, see www.info.sciverse.com/sd/ppv. Please also refer to <http://www.myelsevier.com>.

Live reference

If they are both affiliated with the same institute, then a librarian can take a user electronically to any Elsevier article to which that institute has subscribed access. The librarian can also e-mail an Elsevier article, included in the library's subscription, to the user.

If, however, someone logs in to chat and is not affiliated with the same institute as the librarian, then that user is not an authorized user at the librarian's institute. The librarian thus cannot link the user directly to Elsevier articles or e-mail Elsevier articles to the user. The librarian can, however, explain to the user how to request Elsevier articles through ILL or acquire them through ScienceDirect's Pay per View service.

Use by library guests

Any institute with a current ScienceDirect subscription may allow members of the general public to use terminals physically located at that institute's library to access, search, browse, view and print articles in subscribed Elsevier journals. Libraries may impose their own usage restrictions on such "walk-in users." Commercial entities that wish to make copies for commercial purposes should obtain authorization from the publisher or organizations such as the Copyright Clearance Center.

Bibliographic references

Anyone may, in a bibliography, list a citation for an article published by Elsevier.

Short quotes and reproduction of material from articles

Anyone may in written work quote from an article published by Elsevier, as long as the quote comprises only a short excerpt such as one or two sentences. An appropriate citation, including the journal title, must be provided.

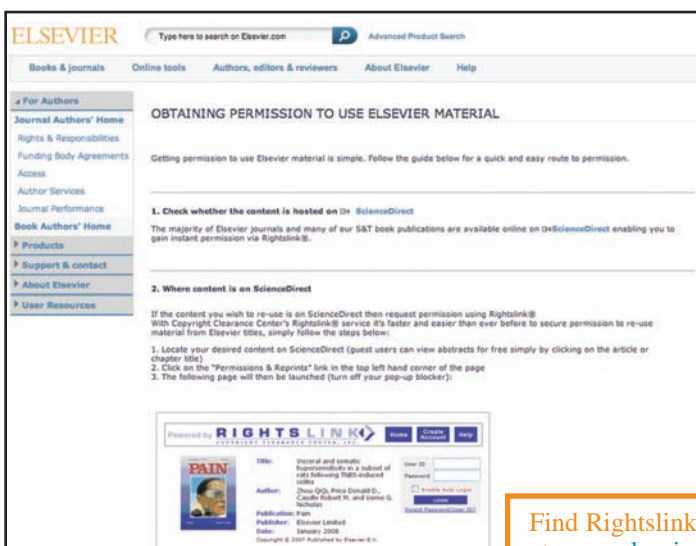

If the intended use is for scholarly comment, noncommercial research or educational purposes, an institution or academic may, without seeking permission from Elsevier, use:

- a single text extract of fewer than 100 words or a series of extracts totaling no more than 300 words
- a maximum of two figures from a journal article or a total of five from a journal volume

These guidelines reflect Elsevier's endorsement of the International Association of Scientific, Technical & Medical Publishers' 2008 guidelines for quotation and other academic uses of excerpts from journal articles. Find more details on these guidelines at www.stm-assoc.org/document-library/ (see Guidelines for Quotations from Journal Articles).

If the intended use or the material needed differs from the categories described above, Elsevier's prior written permission must be obtained. The requestor must provide details of how and where the requested material will be used, such as in a thesis or dissertation or other publication.

Anyone may request permission via Rightslink, the Copyright Clearance Center's service available at the top of the HTML version of every journal article on ScienceDirect. Alternatively, e-mail requests to permissions@elsevier.com.

Find Rightslink instructions on Elsevier's website at www.elsevier.com/authors/askpermission.

Photocopies of articles

National copyright laws generally permit photocopying of an article for personal use.

Elsevier requires permission and a fee for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, copying for resale and copying for all forms of document delivery. Special rates are available for educational institutions wishing to make photocopies for nonprofit classroom use.

Anyone may request permission via Rightslink, the Copyright Clearance Center's service available at the top of the HTML version of every journal article on ScienceDirect. Alternatively, e-mail requests to permissions@elsevier.com.

Purchase of individual articles

Anyone may use Pay per View on ScienceDirect and purchase individual full-text journal articles. This service allows guest users, as well as registered users at subscribing institutes, to purchase direct access to articles. HTML and PDF access is instant and available for 24 hours on ScienceDirect; in addition, purchased articles can be downloaded and stored locally for future use.

Reprints of articles

To purchase individual or commercial reprints of an article published by Elsevier, anyone may request permission via Rightslink, the Copyright Clearance Center's service available at the top of the HTML version of every journal article on ScienceDirect. Alternatively, e-mail requests to reprints@elsevier.com.

Find Elsevier policies at: www.elsevier.com/principlesandpolicies.

Resource Center

www.elsevier.com/authors/resources

The screenshot shows the Elsevier ScienceDirect article page. The article title is "Gene therapy, gene targeting and induced pluripotent stem cells: Applications in monogenic disease treatment" by Gabriel Kun Yung Wong and Andrew T. Chiu. The article is from Biotechnology Advances, Volume 29, Issue 1, January-February 2011, Pages 1-10. A callout box points to the "Permissions & Reprints" icon above the article title.

Access Rightslink by clicking on the Permissions & Reprints icon above the article title.

Since 2007 Elsevier has partnered with the Copyright Clearance Center's Rightslink service to offer a variety of options for reusing Elsevier content. Rightslink provides end-to-end digital rights licensing and reprint services enabling publishers and other content providers to offer their copyrighted material online. This digital solution enables customers to access digital, copyrighted content directly from a publisher's online publication and secure instant copyright permissions – and the content itself – quickly, easily and legally.

The screenshot shows the RightsLink website. The login form includes fields for User ID and Password, and a "Login" button. Below the login form is a "Quick Price Estimate" section with several dropdown menus for selecting reuse options, user type, publisher, and format. A callout box points to the "author of new work" option in the "I am a/an..." dropdown.

When you are in Rightslink and you request to use Elsevier-published content in another publication, please ensure you select "Author of New Work" before choosing your intended publisher from the list available.
